# **RAPID4CLOUD COPY FOR ORACLE ERP CLOUD BROCHURE**

---

July 2018

**AUTOMATION FOR ORACLE® EBS & ORACLE® ERP CLOUD**

# OVERVIEW

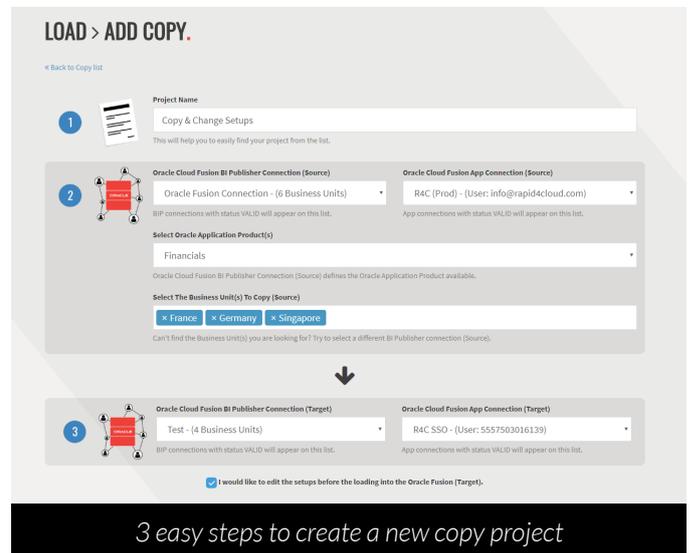

This couldn't be made simpler, select your source and target instance and one or business units to be copied. Changes can be made before loading the setups to the target enabling you to clean up any invalid or unwanted setups.

## ADD A COPY

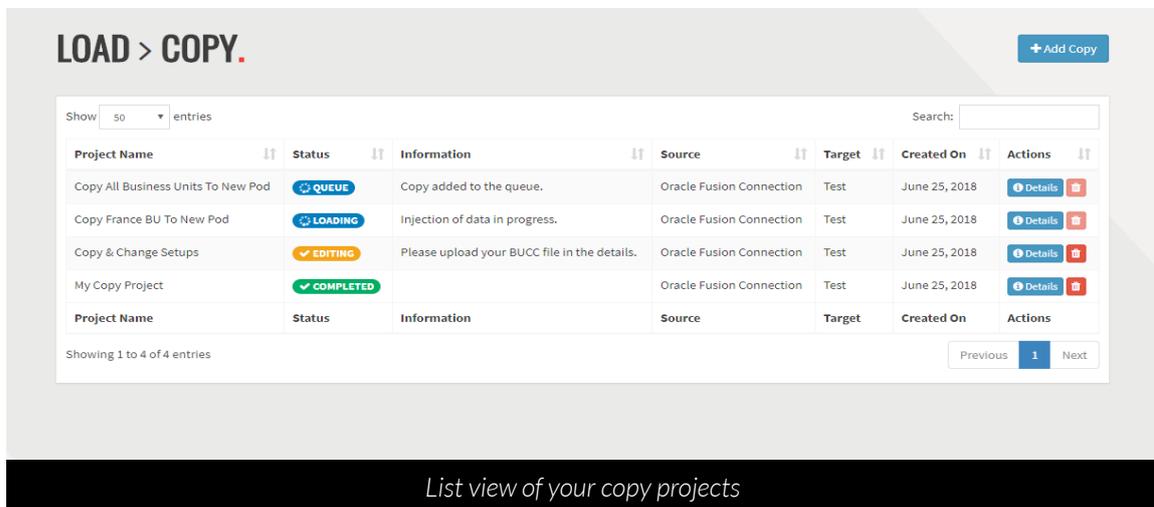

Copy essentially performs an *export* and *import* where you can select one or more business units. If you select all then it will assume that **all instance level configurations** are needed also.

It will compare the setups between **the source** and **the target** and only the ones from the source that do not already exist in the target will be loaded.

A selection of what products you want to be exported provide you with **control over the modules to be copied**. Each product consists of a scenario which contains what setups need to be exported. These scenarios can be customized if needed although it is not usual to need to do this as there is total control over what is loaded also.

3 easy steps to create a new copy project

## TRACK COPY STATUS

The load *takes care of everything*. It knows the dependencies, it takes care of the volume and will work out the most efficient load time.

Once you click **Add Copy** the task will get under way and you can keep an eye on the progress from the screen.

# CUSTOMIZE YOUR COPY

There may be a need to *clean up* some setups or make changes that would be difficult within the Oracle instance.

On the selection screen simply request to edit the setups **before being loaded** and an excel report in BR100 format will be available for download. Make the required changes and upload the result.

The software will review your changes and should there be no obvious errors **the load to the target will commence**.

The screenshot shows a web interface titled "LOAD > COPY DETAILS." with a "Back to Copy list" link. The main content is organized into sections: "Copy & Change Setups" (with a "cancel" button), "Source Settings" (BIP Connection: Oracle Fusion Connection, App Connection: RAC (Prod), Oracle Application Product(s): Financials), "Target Settings" (BIP Connection: Test, App Connection: RAC SSO), "3 Business Units" (France, Germany, Singapore), "BUCC files" (Download BUCC (sent by Rapid4Cloud): Download (45.34K), Upload BUCC (from customer): Click here to upload your BUCC file), and "Technical Information" (Created by: John Doe on June 25, 2018, 10:45 am).

*Details of a copy with links to download and upload customizations*

The screenshot shows a web interface titled "SEND A FILE TO RAPID4CLOUD." with a "Back to details" link. A blue notification bar states: "The file you are sending will be linked to the Copy 'Copy & Change Setups' from Rapid4Cloud, and its status will be changed to QUEUE." Below this are fields for "Your E-mail" (webmaster@rapid4cloud.com) and "Send To" (Consultant Department). There is a "Your Message" text area and an "Attach a file (5GB max)" section with a "Choose File" button (No file chosen). A "Send File" button is at the bottom.

*Securely send your customizations to apply to your copy project*
