# **RAPID4CLOUD ROLLOUT FOR ORACLE ERP CLOUD BROCHURE**

---

July 2018

**AUTOMATION FOR ORACLE® EBS & ORACLE® ERP CLOUD**

# OVERVIEW

Setting up new business units based on an existing line of business suddenly became very easy. Rollout will extract and analyze an existing business unit and produce a global master template with a questionnaire of all the setups that must be changed to be able to successfully setup more business units.

## EXTRACT & ANALYZE

Select an existing business unit and the extract and analyze phase will produce a global master template.

This **global master template** will be the basis of the standards your organization wishes to ensure that all future business units will use. This template can be externalized in both HTML and Excel format enabling you to make further changes to reflect the standards the business needs.

Once the extract and analyze phases completed **you will receive a notification.**

The screenshot shows a web form titled "LOAD > ADD ROLLOUT." with a "Back to Rollouts list" link. It is divided into three numbered steps:

- Step 1:** "Project Name" with a text input field containing "My project name". A note below says: "This will help you to easily find your project from the list."
- Step 2:** "Oracle Cloud Fusion BI Publisher Connection (Source)" and "Oracle Cloud Fusion App Connection (Source)". Each has a "Select a connection" dropdown. Notes indicate that only connections with status "VALID" will appear. Below these are "Select Oracle Application Product(s)" (dropdown with "Financials" selected) and "Select The Business Unit To Rollout (Source)" (dropdown). A note at the bottom says: "Can't find the Business Unit(s) you are looking for? Try to select a different BI Publisher connection (Source)."
- Step 3:** "Oracle Cloud Fusion BI Publisher Connection (Target)" and "Oracle Cloud Fusion App Connection (Target)". Each has a "Select a connection" dropdown. Notes indicate that only connections with status "VALID" will appear.

A green "Add Rollout" button is at the bottom. A caption below the screenshot reads: "3 easy steps to create a new rollout project".

The screenshot shows a web interface titled "LOAD > ROLLOUTS." with a "+ Add Rollout" button. It features a table with columns: Project Name, Status, Information, Source, Target, Created On, and Actions. The table contains five rows of rollout projects with various statuses like COMPLETED, LOADING, EDITING, EXTRACTING, and QUEUE. A search bar and pagination controls are also visible.

Project Name	Status	Information	Source	Target	Created On	Actions
Rollout Project 01	COMPLETED		Oracle Fusion Connection	Test	July 10, 2018	Details, Delete
Rollout Project 02	LOADING	Injection of data in progress.	Oracle Fusion Connection	Test	July 10, 2018	Details, Delete
Rollout Project 03	EDITING	Please upload your BUCC file in the details.	Oracle Fusion Connection	Test	July 10, 2018	Details, Delete
Rollout Project 04	EXTRACTING	Extraction of data in progress.	Oracle Fusion Connection	Test	July 10, 2018	Details, Delete
Rollout Project 05	QUEUE	Rollout added to the queue.	Oracle Fusion Connection	Test	July 10, 2018	Details, Delete

Showing 1 to 5 of 5 entries. Previous 1 Next

## MULTIPLE LINES OF BUSINESS

You can create **different global master templates** and use the appropriate line of business template for the new business unit or simply perform the extract and analyze phase for each business unit.

# PERSONALIZATION

The global master template can be tweaked and changed **for each business unit**.

The questionnaire reflects the personalization's that need to be effected upon the master template for the new business unit.

**Country Localizations:** Oracle are providing more and more localizations for each country. They still need setups however to make them work. These setups can be attached to the personalized business unit setups before loading to the Oracle instance.

Once you have completed the questionnaire and any modifications needed to the global master template you can use the upload feature which will **trigger the personalize and load phase**.
